ABOUT ALTERNATIVE METHODS OF VOTING FOR GENERAL ELECTION IN AUTHORITIES

In the work we analyse fundamental inadequacy and unfitness of a present voting method (plurality voting) for such tasks as general election in authorities. It is shown that measuring of public opinion (public will) which happens on general election in authorities by means of a traditional voting method, is accompanied large-scale distortions at the most honest counting of votes. Alternative voting methods have been discussed.

Keywords: ordinal and cardinal voting methods, plurality voting method, measurement of public opinion, vote splitting effect, protest vote, soft rating (approval voting (AV)), “insincere” or “strategic” vote, democracy, public choice.
