

Smorodinskaya, N. **The Globalized Economy: from Hierarchies to a Network Order.** Moscow, Institute of Economics, Russian Academy of Sciences, 2015. - 344 p.

CONTENTS

Introduction	7
Chapter I. The Paradigm Shift and the Rise of the Network Social Order	
1. Prerequisites for the transition of economic systems to a network order.....	12
2. De-sovereignization of the globalized economy.....	20
3. Erosion of hierarchic system of governance and emanation of the network society.....	27
4. The emergence of dispersed network companies.....	38
Chapter II. Network Interactions as New Institutional Environment of Modern Economies	
1. The phenomenon of collaboration and the formation of innovation ecosystems.....	48
2. Triple helix model, or the government-business-academia collaboration.....	56
3. What innovation-type clusters really are (conceptual points).....	68
4. How to classify various types of networks.....	82
Chapter III. Cluster Networks as New Building Blocks of Economic Systems	
1. Clusters as a special class of industrial agglomerations.....	93
2. Clusters as a special class of innovation ecosystems.....	105
3. Cluster initiatives as a special class of economic projects.....	116
4. Peculiarities of cluster models in a number of countries.....	126
Chapter IV. The Cluster Approach in today's Industrial Policy	
1. Evolution of the industrial policy models from classical to systemic.....	137
2. The cluster approach to raising competitiveness (Porter's concept).....	147
3. Ways to support and develop the cluster-network-based environment.....	159
4. The cluster idea in new industrial policy in US, EU and South East Asia.....	172
Chapter V. Networking as a Driver of Innovation-Led Growth: Experience of the Nordic Europe	
1. Horizontal logic in the Nordic growth model and the Baltic Sea Region integration.....	187
2. Competitive advantages of the Baltic Sea Region as the first EU macro-region.....	201
3. Innovation edge in the EU Strategy for the Baltic Sea Region.....	213
4. Transnational cluster- and network-based projects in the Baltic Sea Region.....	226
Chapter VI. The Network Order and Dilemmas of Russian Modernization	
1. The undeveloped horizontal linkages as a factor of economic setback.....	237
2. Institutional lock-ins in Russian cluster policy.....	252
3. Growth without development and the crisis spiral in today's Russian economy.....	267
4. Smart re-industrialization as a possible anti-crisis scenario.....	287
Conclusions	310
List of tables and figures.....	321
Bibliography.....	324
