REGIONAL ECONOMIC INTEGRATION IN XXI-st CENTURY

Regional economic movements were born due to one-sided understanding of the globalization nature. The majority of researchers and experts didn’t pay enough attention to parallel strong processes of fragmentation. Sovereign economics are unable to compete with the partners of a global level. Regional integration became a balancing factor, creating a three link system “globalization — regionalization — sovereign economics”. The author makes an effort to determine possible size and borders of regional economic integration and proposes to enrich integration by adding to it partnership relations. Eurasian continent and Eurasia are now in search of new megastructures.

Key words: regional economic integration, integrational threshold, partnership, megaregion, globalization — fragmentation.

PROBLEMS OF THE TAXATION OF THE INCOME OF NATURAL PERSONS: DOMESTIC AND FOREIGN EXPERIENCE

In article questions of an assessment of economic efficiency of the tax law in the field of payment of a tax on the income of natural persons are investigated. The problem of improvement of tax administration of a tax on the income of natural persons historically is one of central and key in the taxation. The ascending scale of the taxation will give the chance to redistribute a national product in favor of needy segments of the population. The raising of a level of the income, not taxable, will allow to increase the real income of needy segments of the population and middle class, to remove social stress in society. The task of further harmonization of the tax law, elimination of disproportions and creation of equal economic conditions in the sphere of the taxation of natural persons remains priority.

Key words: tax on the income of natural persons, tax law, tax control, tax deductions, tax resident.
